Comments: I fully support allowing Class 1 e-bike use on Forest Service mountain bike trails.

I've been mountain biking for the past 16 years, including 2 years of riding a Class 1 e-bike on local State and City trails. Based on my experience, e-bikes do not damage the trail surface and do not impact it's long term sustainability.

I am an aging rider (66 y/o) and I look forward to riding many more years - e-bikes make it possible!
