Comments: Hello, I am a 53 year old who lives in Davis County Utah. I have been an avid cyclist for over 30 years and have gravitated to mostly mountain biking over the last 10 years. I have ridden all over the great state of Utah and love the variety and trails we have available.

Although I do not own an e-bike, I am a big proponent of them. I believe they allow more individuals, that otherwise couldn't, to enjoy the healthy recreation of mountain biking. People have many reasons why they may need a little assistance on the trails, including health, age, limited time to train etc. I see no logical reason why these individuals should be denied access to the same trails I ride. e-bikes do no more damage to the trail, still require some effort and do not pollute either by noise or exhaust. I am all in favor of allowing them on all trails accessible to regular mountain bikes. Thank You
