Comments: Please, if this is allowed, we need to make sure the people are educated on how to be on the trail with horses. I have had , and have seen some terrible wrecks this last year with bikers, both motorized and non motorized on BLM trails. With cycling becoming more popular people are getting more involved with the outdoors, which is a good thing. But they do not know the rules of the trail. We really need to keep something for the horses. But if we do have to share the trail we have to find a way to educate a group that doesn't want to take the time to be educated on trail safety.

I'm afraid our rescue people will be keeping a little busy rescuing from all the wrecks.
