Comments: Having horse trails and e-bikes share the same trails is NOT a good idea. A horse is a prey animal and having bikes motorized or not come flying out of nowhere is a hazard to all parties involved. Bikes tear up trails any how. Bike users are rude more times than not, and seem to think that they own the trails, it is not safe for horse back. I do not favor having e-bikes on horse trails they need their own designated trails away from horse trails.
