Comments: I am involved in land management in our area for our Corner Canyon trail system. I feel uniquely qualified to weigh in on this proposal. This area has such vast potential for recreation opportunities. While I do want it to be protected from mining , logging etc, this area needs to be open for future non motorized use bit OPEN FOR HUMAN POWERED transportation (mountain bikes). It is such a vast area that there are places that can be reached much easier and efficiently on a mountain bike versus hiking. To designate this area as wilderness and ban bicycles seems like the short sighted or easy way to keep it from being developed. But in the end we do want people to be able to enjoy this area and having it be hiking only seems to not consider the vast numbers of people, families, kids who could enjoy this more is it were to remain open to biking.
