Comments: E-bikes should be managed by the forest service just like the BLM. let them be on the same trails as bikes. Obviously if there are different levels of ebikes it should only be the lower pedal assist ones allowed. They do no more damage than a regular mountain bike. It allows my 70yr old dad to ride bikes with his teenage grandsons in the mountains. ironic that so many mountain bikers are against ebikes. Forest land is for public and all should be allowed.
