Comments: I appose the proposition to allow E-bikes on USFS trails designated as "non-motorized" use only. E-bikes have a motor-plain and simple. They are motorized.

The bikes are simply too fast and dangerous to keep everyone safe on non-motorized trails. This equipment can produce very high speeds going up and down. We can not assume that everyone will respect one another's safety and this could end up with very bad consequences.

There are plenty of trails to be ridden for these users on designated motorized trails.

Thank you for your consideration to NOT allow e-bikes on USFS trails designated as "non-motorized" use only.
