Comments: I fully support allowing e-bikes to access all trails now available for non-e-bikes. I ride both and they impose the exact same level of effect on soils and terrain. E-bikes allow those with less stamina or physical ability to access our public lands that otherwise is only available to the young, strong and/or fit. This is not fair. Presumably, we all pay our fair share of taxes for these lands. We should all benefit from our tax payments.
