Title:

Comments: MTB ebikes allow people like me who used to MTB single track like a kid because I was a kid! 3 knee surgeries, 3 kids, and 3 or 4 decades later I'm back on challenging trails, riding daily all year round and loving it! Be happy for us ebikers, ya'all! Happy, healthy people make a better community! Remember it's our generation who pioneered MTB biking on fairly crappy bikes. We've earned it. We are gentle on the trails, we are respectful of walkers and other bikers, most of us are also mountain bike riders. The bikers care about the condition of the trails are careful not to ride one trails are muddy. We love and appreciate the trails and appreciate our unique natural resources unique to Alaska.
