Comments: E bikes have allowed my wife and I to enjoy trails in our state together like we have never been able to before! The possibility of being able to enjoy and ride the some of the most highly rated trails on forest service land is very exciting. I know many others as well that e bikes have made the great outdoors in this country accessible.

I have been a mountain biker for over 15 years and after riding a class 1 e bike, I can attest that it is no different than a regular mountain bike. It just allows one to ride longer.
