Comments: I recently purchased a Class 2 e-bike and it's a game-changer for me. I was diagnosed with lupus 22 years ago and have several related health issues that prevent me from prolonged physical exertion. The pedal assist feature brings me great joy as I can ride much farther now! I know that I can ride on Forest roads, but always have to be on watch for higher-powered vehicles. It would be great to have some trail-riding options, whether shared with standard bikes or not. The USFS is pretty good at managing land for multiple uses and I believe you'll come through for us on this one too.
