Title:

Comments: Please do NOT open up non-motorized trails to E-bikes. At the pace of technology development e-bikes will rival and exceed the power of the best motorcycles damaging trails far faster than non-motorized bikes.

Go compare any motorized to non-motorized trails in the same area and the difference is obvious. Motorized uphill travel ruts and damages trails far faster than any non-motorized method.

In addition, E-bikes provide means for new unskilled riders to go further and faster than compared to non-motorized methods. This increases the risk of injury and probably of rescue costing tax payer dollars.

Finally, no one is going to pay any attention to Class of e-bike on the trail. Simply allowing them in any form opens up all classes to the trail.
