Comments: I have seen the tremendous growth of e bike use in our area. Although I love the idea that it increases recreational opportunities to those otherwise limited due to age, wellness, etc. this is not at all what I am witnessing. I am seeing the majority of users as young, fit and able opting to use their e bikes because it allows for more miles in less time, an approach appropriate for motorized trails. Due to the speed they can reach and the number of users it attracts, I would appreciate all users (hikers, mountain bikers, trail runners, equestrians) be considered and e bikes not be allowed on non-motorized trails. Thank you.
