Comments: I think that Class 1 and Class 3 pedal-assisted ebikes should be allowed where ever bicycles are allowed. As someone whose knees are not what they used to be, pedal-assisted ebikes take the place of a regular bicycle. I don't consider them to be a motorized vehicle. When the battery dies, they're pedal powered only. They aren't licensed as a motor vehicle nor do you need any special license endorsement to ride them like you do for motorcycles.
