Title:

Comments: Having extensive experience riding regular bikes (MTB, road, gravel) and Ebikes I believe the Forest Service and National Park Service should open up trails to Ebikes, at least class 1s. I do not ride bikes faster than I do regular bikes but with the assist I can ride longer and tackle steeper terrain. My wife and I are in our 60s and the assist certainly allows us to ride in more places. Ebikes also would allow increased access to less able riders.
