Title:

Comments: pedal assisted ebikes have been shown to not do any more damage to trails than standard mountain bikes. I believe as long as public lands aren't being damaged that ALL members of the public should have access. Ebikes give people with disabilities better access, and also give access to people who are not in a great of shape as other people. We can all share the trails and do it in a productive way. Class 1 ebikes should be allowed.
