Comments: E-bikes should not be allowed on trails designated as non-motorized.

E-bikes are considered a type of motor vehicle and should not be allowed, no different than a motorcycle or off-road vehicle. Allowing E-bikes will certainly cause additional trail impact and minimize the overall enjoyment for those who are on the trail without motorized power. The Forest Service has already gone through a great deal of effort to restrict these trails to non-motorized, please keep it that way.
