Comments: I absolutely support e-bikes in all USFS, BLM, and government land. While there is massive misunderstanding around them, they are no different than an analog/acoustic bike and also allow for individuals with certain disabilities to access public lands like the rest of us able body individuals. I should also clarify that I only support Class 1 e-bikes on trails, not Class 2 or 3 bikes, nor do I support motorcycles on non-motorized trails. We should grant further access to Class 1 e-bikes on non-motorized trails nationwide.
