Comments: Being over 65 and a avid mountain biker for 25 years I would like to have e-bikes allowed on all trails.

I have had a e-bike for a few years and find I now can go on trails that I was not able to do in the last few years because of my age, Hip replacements, Knee replacements and other health issues. I find the public land managers are now limiting e-bikes in the last few years. This is very very wrong. My e-bike does not do any more damage to the trails than an ordinary bike. Many studies have proven this. What is happening is the Elite young mountain bikers are trying to keep older, and physically handicapped persons off the trails; discrimination against us.

This is public land Please allow the use.
