Comments: I think it would be insane to allow a motorized vehicle (powered by electricity, like cars) on non-motorized trails. As a Idaho non-motorized trail funds donater I would disgusted if they were allowed. These bikes can travel at much faster speeds than a human powered bike. Technology, will only advance with these bikes as well.. This could be dangerous to those like myself who enjoy, and maintain local trails. How could to prevent/regulate how much tourqe these bikes put out causing ruts and wear and tear on these trails?
