Comments: I strongly urge NFS to allow e-bikes on all NFS roads, NFS trails, and in areas on NFS lands where regular bicycles/off road bicycles are allowed.

As a 70 year old female, I can no longer ride a normal unassisted bicycle on mountain trails as I could in the past. And I don't want to ride along side jeeps and ATVs, as that could be unsafe for me. I no my situation is shared by many older Americans and those with disabilities.

I expect that such a change might require some limitations regarding speed (which should be applied to all bicycles as I've been nearly run over many times by off road bicycles careening down a mountain trail).

Thank you
