Comments: I strongly support the opening up of trails on our public lands to e-bike access. I am 70 years old and my wife 67. We purchased e-bikes so we could recreate together. She has foot problems and can no longer hike any great distance but can ride her bike all day long. We have really found something fun, outdoors, and rewarding in riding our e-bikes on the few public trails where they are allowed such as the Gateway trail system on the Shasta-Trinity National Forest near Mt. Shasta. We have been discouraged to find other mountain bike trails closed to e-bikes when it makes no sense. Please open all the trails you can to e-bike usage.
