Comments: I personally have and use a regular mountain bike and a class 1 e bike. The only difference between the two is that one pedals easier. They should be allowed on all the same trails so that more people can enjoy getting out and enjoying the forest land resource. There is nothing that can be said that shows any negative problems allowing the Cl 1 e bikes to ride on the same trails as regular bikes except that some mountain bikers think it makes them macho being able to ride the regular bike and it hurts their feelings being passed up by people who are also pedaling an e bike (that is easier to pedal).
