Comments: Hello, I is very sad to hear that Targhee ski resort is wanting to expand into Teton Canyon. That canyon is one of my favorite places anywhere and my friends and I have spent many days both summer but especially winter enjoying its beauty and grandeur. Expanding into that canyon would greatly diminish it. Its also home to many animals who can't handle more stress than they already have. I beg you to not consider expansion so close to the wilderness boundary or even in it? (I noticed they cleverly left the wilderness boundaries out of their maps). More and more are learning the joy of human powered recreation and do not want the remaining wilderness marred by man. Please leave this land pristine for future generations!

Thanks,

Stan Pitcher
