Title:

Comments: E-bikes should remain classified as motorized vehicles. I am against any allowance of them in any non-motorized area. Hunters will begin using them to get camp gear further into areas that are non-motorized. They will widen and clear old road beds and go around road blocks. Please enforce the rules so that those who follow them are not at a disadvantage.

Hiking three miles into a non-motorized area should not end with seeing a camp hauled in using an e-bike.
