Comments: I am planning within the next year to purchase a mountain e bike. I have been riding weekly the past 10 years after my retirement. MY age is 71 and an e bike, for mountain trails, will allow me to climb hills that currently I am no longer able to ascend. I am not a fast rider, and am all ways courteous to hikers and those on horseback. My view of the e-bike is not one for the road on trails but a bike specifically designed for trails and off road activities. I should also note I really do enjoy riding the fire roads within the National forest.
