Comments: I fully support access by Class 1 E bikes to any location manual bicycles are currently allowed.

I love biking, follow all rules including no trace, and do not engage in reckless riding.

My muscles are strong, but cardio isn't strong enough to ride uphill for too long. Ebike class 1 gives me enough boost to go on these forest trails, and enjoy the outdoors safely and responsibly, and stay healthy. Ebikes are also practical for my case since I know I can get back home which is again a uphill bike ride.
