I rode my first E-Bike last weekend in Moab and Wow! I rented the bike so my son wouldn't have to wait forever for me, mission accomplished!

After two days and 36 miles I personally see no reason for not letting these bikes ride all of the trail systems. The only issue I see is that the E-Bike can roll faster than a traditional bike so some newbies may be going faster on flowing trails than their brain or brakes will engage, but then again that can happen on any bike going downhill.

My vote is 100% E-Bikes on the trails, all of them.

Good Luck
