Title:

Comments: I started Mtn biking in 1993 and bought my class1 ebike in 2014. I have ridden over 3,000 miles on my ebike mostly single track at many different parks. Never once have I had any incident because of my ebike. I follow the trail etiquette rules that every mtn biker should follow be it an organic bike or an ebike.

I have exhausted my thinking of why an ebike ridden by a responsible rider could harm, damage, interfere, endanger, the trail and the hikers, organic bikers and equestrians who share the trail. THEY DO NO MORE HARM THAN ORGANIC MTN BIKES on trails...

This new technology will only help people enjoy the sport more, just like the ski chairlift did for skiing and the golf cart did for golf.

Please treat class 1 ebikes the same trail access just as you do organic bikes! Let all the people, young, old, handicapped, beginner, enjoy this sport just as skiing and golf do!
