Comments: To whom it may concern/ US Forest Service/ re: Stibnite Gold Project:

I respectfully ask that you do everything possible to advance this worthy project in as timely a manner as possible. This is a very unique project in that: 1) Restoration of the land and re-establishment of the water quality is a very important benefit of seeing that this project receives approval. I am a lifelong outdoor enthusiast and the environmental improvements this project will bring should be reason in and of itself to see that this project receives approval. 2) The project is led by a very experienced management team, Midas Gold, with healthy financial backing. 3) Many well paying jobs will be available to see this project through to completion and give hard working folks good jobs for many years to come. 4) The antimony at the site is the largest source in the United States---it is strategically important economically and for security reasons. 5) This is a win-win situation for the local community, The US Forest Service, the environment, the economy and the United States. Midas Gold is in the right place at the right time. There are numerous benefits to allowing this project to proceed and I cannot name a single negative. I please ask that this project is allowed to proceed. Thank you so much for your thoughtful review.
