Title:

Comments: I am OPPOSED. Allow permits to the elderly and disabled as needed, but a blanket approval of e-bikes will greatly degrade our trail systems and displace traditional user groups (cyclists, hikers, and trail runners, equestrian). It will create higher incidences of accidents and on-trail conflicts. E-bikes are fun and incredibly capable, they have the ability to make all trails shred-able, even the boring ones, and they can go places other bikes simply can't go. They need their own category and their own set of rules.
