Comments: Please do not allow any class of ebikes on trails that are designated wilderness or even trails that are specifically for mountain bikes. There are plenty of motorized trails where these ebikes can be used. I am an ebike owner, and I would not ebike on a mountain bike trail. It would be quite disturbing to cruise up behind a mountain biker at 18 miles per hour and I don't think it's appropriate. I also think it's disturbing to the wildlife. Let's leave these trails to nature and maintain the quiet, solitude and slow pace. High speeds are not appropriate in nature.
