Comments: As a woman in her 60's who recently bought an electric pedal assist mountain bike, I am in favor of allowing pedal-assist e-bikes on roads and trails categorized as 'non-motorized' under the control and managed by the USFS. I am not in favor of non-pedal assist e-bikes on non-motorized roads and trails. Pedal assist for all classes of e-bikes makes sense because the speed at which I ride is not faster than those very fit mountain bikers on non e-bikes. The pedal assist e-bike allows me to confidently and safely enjoy roads and trails I otherwise would not feel comfortable riding. Please consider allowing all classes of pedal assist e-bikes on non-motorized trails. Thank you.
