Comments: I wish to submit this comment for the public record. I am 72 years-old and years ago I used to mountain bike on public single track trails. Due to age I had to quit. Recently I bought an e-mountain bike and I am thrilled that I can again ride these trails. I have not experienced any negative feedback from other trail users either pedestrian or on bikes. I am in favor of opening as much public land as possible to all classes of pedal assist bicycles.
