Comments: I am an avid mountain biker, motorcycle rider, and e-biker. I believe e-bikes should be allowed on forest service trails that are currently classified as non-motorized. No noise, no harm to trails, no emissions, just a bit of extra help on the uphill, but no faster on the downhill than a regular mtn. bike. I'll never ride my motorcycle on a non-motorized trail because it's loud, emits exhaust, and can hurt the trail. An e-bike does none of these things. Of course, designated wilderness areas will remain off limits. Please allow e-bikes on all national forest trails that currently have a non-motorized status. Look at Europe as an example of the coming trend...a recent visitor there could ONLY rent e-bikes for the trails, regular mtn. bikes have been phased out for the most part. thank you.
