Comments: I respect the effort and agree wholeheartedly with the intent to incorporate this use WHERE APPROPRIATE. I have significant questions about the intent of letter g.) in 7710 that mentions trails designed specifically for e-bike use... What context is that being made in? My understanding is that people largely want to be able to ride e-bikes on forest trails and singletrack. As a dedicated rider and maintainer of the trails, I see no problem with this. Continuing to build the ethic around trail use would be much easier and effective than trying to keep people with e-bikes off of the trails or sequestering them on their own trails...
