Comments: Hi There!

Nope - no e-bikes on non-motorized trails! E-bikes are, by definition, motorized! The designation of classes of e-bikes is disingenuous and is currently exploited and abused. Mountain bikes, hikers, wheelchairs, and horses only on non-motorized trails. Motorized - be they e-bikes, motorcycles, or scooters, must be kept to roads and motorized trails ONLY.

E-bikes passing each other, passing other users, and by their very nature will widen trails and create undesirable resource degradation. User conflicts can be easily avoided by keeping bio-powered and artificially powered gear separated and confined to their designated trail/road systems.

E-bikes, like other motorized transport, will aggravate an already problematic situation with the expansion of noxious weeds and invasive species.

Keep e-bikes on roads and motorized trails. Do not encroach on non-motorized space and uses of public lands.

Thanks for your consideration.

Jeff White
