Comments: I support allowing e-bikes on NFS trails. It is great to see more people out being active. I hope we can someday quantify the extra trail usage and use the numbers to justify the building of more trails. I personally don't mind being passed by an e-biker and agree with other comments that efforts should be focused on teaching trail etiquette to all types of users. There might be a day where I am faced with the reality that I'm only able to get out on the trails with a slight motor assist. Possibly there is a way to open up several trails in a region as a test prior to opening up all trails right away. E-bikes are another commercial option to help out local businesses by attracting new users.
