Comments: While I dont have an issue with e-bikes being allowed on some trails, the reality is that many of us hike and mountain bike to experience solitude in nature. When we arrive at a destination, we'd rather have some peace and quiet, or at least share it with others who worked to get there. Allowing e-bikes to use all FS trails will destroy the reward for many of us, and will greatly increase the number of people using trails, affecting trail quality. E-bikes also tend to climb trails that are primarily used for descending which creates a dangerous situation. Please do not allow e-bikes to travel all of the same trails as mountain bikers. Thanks!
