Comments: As a lifelong visitor to national parks, monuments, BLM, Rec. areas, etc, an Rv-er, past back packer and lover of the outdoors, I urge the acceptance of e-bikes on bike trails, with speed limitations. Being in my 70s, an e-bike allows me to continue to enjoy outdoor recreation as I did on a regular bike when I was younger. I understand that some limits may need to be imposed to prevent misuse of trails by those who would go too fast and behave recklessly. But to ban e-bikes would be a disservice to those of us who are ageing and to those with handicaps or medical conditions that make use of an e-bike the preferred or only mode of enjoying trails open to bikes.
