Comments: I purchased an ebike this summer after my 7th knee surgery. I am a mountain biker, love biking, but need help going uphill to reduce the stress put on my knees in order to continue biking with my family. I am not riding to go fast, seeing my husband still beat me up even with my pedal assist. I would like to see Class 1 ebikes be allowed on ALL trails that mountain bikers are allowed on. This would allow me to not be so limited on where my husband and i can go together. Another idea would be that for those of us that have the ebike for disability type reasons (like mine, knee replacements, hip, heart conditions, etc) that we get a letter from our doctors to keep with us. thank you so much for you consideration. This means so much to me and my family.
