Comments: Hi, I am in support of opening up forest service land to class 1 e-bikers. I see continuing stigmatization of ebike riders and needless arguments about legality and access. Fully legalizing pedal assist ebike access to forest service trail systems will move the sport forward in a direction of support and access for the less-abled and those wanting to simply recreate on the same trails with their friends.

I have seen no evidence of increased environmental damage that goes beyond what ever-increasing numbers of non-ebike cyclists do by our own numbers.

Thanks for your time and effort on this project!
