First name: Steve

Last name: Waring

Organization:

Title:

Comments: I am a 70 year old male (White if that matters) and last year I bought an e-bike that includes a throttle. It has fat tires and is equipped for trail use. At the moment I have not used it on USFS lands or trails, but I want that to be an available option.

It allows me to access and enjoy Federal Public Lands that I am unable to otherwise utilize and enjoy equally with those with more physical robustness than I at this point in my citizenship. (My hips and feet no longer tolerate hiking and regular biking activities)

PS

These Links did not work so I did not waste time on the others:
