Comments: E-bikes, type 1 in particular, are useful methods of exercise and transportation. They are only marginally different from regular bikes. They should be allowed in any area that permits bikes as the motorized aspect does not make them dirt bikes and they should not be classified in the same way. They should be allowed wherever bikes are permitted. While they are technically motor vehicles, they should not be considered in the same light as ATVs, trucks and motorbikes as the motorized aspect is not significant when considering trail use.
