Comments: I favor permitting class 1 e-bicycles to access any trail that is accessible by a bicycle. I am a 71 year old mountain bicyclist. I have lived and bicycled in the North Lake Tahoe area for the past 48 years. This activity is my primary aerobic exercise. It keeps me physically fit and healthy. As I have aged, the steep trail terrain has become more difficult to ascend as my heart rate becomes dangerously high. A class 1 e-bike allows enough pedal assist on hills so I can safely continue to enjoy my passion for mountain bicycling. Impact of class 1 e-bikes the trail is the same as a non e-bike. I was in Grand Teton National Park recently. As I read over an informational handout I noticed rules and policy regarding bicycles. It was noted that class 1 e-bikes were considered to be bicycles and permitted and allowed to use the same trails. Please do the same.
