Comments: There is no legal basis to classify an e-bike as anything other than a motor vehicle in consideration of off highway riding. An electric motor bike is just an electric motor vehicle still needing the same registration and rules as all other off highway vehicles.

The loss of existing motorized trails to allow e-bike only trails is uncalled for, and would only cause division within people who have the common interest of enjoying riding trails. Areas could be created to cater towards unique off road interests without causing bitterness and animosity amongst people.
