Comments: Hi.

Summary - I'm for Class 1 e mountain bikes having the same access as traditional bicycles.

I'm a 50 year old guy who used to mountain bike often in my 20s and 30s. Then life happened. I had been dying to get back on a mountain bike and ride some trails but have been held back by the climbs vs my fitness level. I recently bought a pedal assist Class 1 e mountain bike which made the re-entry easier since I can keep up with my buddies while I re-build my fitness. Hopefully in another year or so, I'll be in good enough shape to go back to a normal pedal bike.

I hope you don't change the rules too drastically where I can continue riding my class 1 e mountain bike with my friends. Thank you.
