Comments: Hello.

I am an idaho resident and I do not support the placement of any gold mine on the South Fork. The natural resources in Idaho, including the salmon that run through the South Fork, clean water, and the environment surrounding that area would be devastated by the placement of this mine. I do not support endangering the state of the South Fork for gold. This area of Idaho contributes financially to the state in the form of rafters, anglers, and other water recreation, which would swiftly stop if this mine was approved.

Please protect Idaho, and keep it the greatest state in the nation.
