Comments: I wish to express my opposition to the San Antonia exploration Drilling proposal #58629. The San Rafael Valley and it's watershed is too valuable to put in jeopardy by mining. The encroachment on the San Rafael Valley of a drilling project in surrounding mountains could threaten the delicate balance of this beautiful valley, one of Arizona's great treasures. The multiple water sources feeding the Santa Cruz river must remain protected from the serious impairments that mining projects have historically demonstrated time and again. This valley with all of its unique beauty, ecosystems and wildlife must remain safe from predation that mining brings.
