Comments: Dear Ranger Stull,

I am writing in support of the Pedlar River North Vegetation Management Project. As a volunteer with the Ruffed Grouse Society, I am encouraged to see the effort to establish early successional habitat in an area sorely in need of it. I am pleased to see the plans to particularly establish wildlife habitat- wildlife openings, seeded log landings and temporary roads, etc. As well, it is good to see the proposed planting of American Chestnut and also that the project will generate forest products for the local economy.

Thank you for the opportunity to comment.
Tom Pratley
